

Address: East of Tianmu Road, Laiyang Development
Zone, Yantai City, Shandong Province, 265200, China

Composition Statement

Phosphatidylserine (PS) derived from sunflower lecithin is a fine, slightly yellow powder with a characteristic odor. The product is 100% produced from sunflower l-alpha-phosphatidylcholine and L-serine. We strictly control the production and packaging processes to ensure that the final product complies with the established specification standards. No additional nutritional materials are used or added during the production process.

Here is the composition of Phosphatidylserine from Sunflower Lecithin:

Component	Percentage
Phosphatidylserine (PS)	$\geq 60\%$
Other Phospholipids	10%~15%
Compound Sugar	~15%
Sugar Ester	~15%
Triglycerides	~ 2%
Silicon Dioxide	Maximum 2%
